Product Announcement

The Titan Twin-Point Handle

It's easy to get carried away with the relaxed lifestyle of Bi-Fold doors, and during those inevitable moments when the key is mistakenly left in the lock, the clever technology behind The Titan Twin-Point Handle grants homeowners peace-of-mind there will be no risk of damaged panels or keys!

With the user's swift 'lift and turn' manoeuvre of the slimline lever, the key cylinder automatically retracts when the door is unlocked and opened; perfectly nesting both handle and key between the panels allowing a smooth concertina without hindrance from locking hardware.

Available in a stunning collection of designer finishes, the stylish Titan Twin-Point Handle enhances the luxuries of Bi-Fold doors with the comfort of damage-proof locking.
